✨ Triwizard Adventures ✨

Have you ever imagined yourself going to Hogwarts? Learning spells and practicing them alongside Harry Potter? Winning the Triwizard Tournament? Triwizard Adventures gives you an opportunity to fulfill those dreams. This Python-coded RPG allows you to participate in the Triwizard Tournament from the *Harry Potter* books as Viktor Krum, Fleur Delacour, Cedric Diggory, or even Harry Potter himself! Once you choose a character, you are presented with choices on how to react to the story. Your choices affect how the story goes; choose from multiple paths for decisions to help you prepare for the challenges in different ways. Every choice lets you learn different spells, which you can use in duels at the end of each level. Fight mythical creatures like dragons and mermaids, but be careful! If you lose, you have to start the game again.

Spells Featured in the Game:
- Expelliarmus - reduces your opponent's health by 10
- Stupefy - reduces your opponent's health by 15
- Confundo - reduces your opponent's health by 10
- Episkey - increases your health by 10
